PROFESSIONAL SUMMARY

- **AI Full Stack Engineer** with 2 years of experience building production web applications and AI-powered APIs. Builds responsive frontends with **React, Next.js, TypeScript, and Tailwind CSS**, and scalable backend services with **FastAPI, Python, and Node.js**. Integrates LLMs into real products using **RAG, LangChain, vector databases, and multi-agent workflows**, and delivers features end to end, from UI to API to deployment.

EDUCATION

- **University of Engineering and Technology** Lahore, Pakistan
Bachelor of Computer Science Sep 2021 – Jun 2025
Courses: Operating Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases

SKILLS SUMMARY

- **Languages:** TypeScript, JavaScript, Python, SQL
- **Frontend:** React, Next.js, Tailwind CSS, HTML, CSS
- **Backend:** FastAPI, Node.js, REST APIs, OpenAPI/Swagger, Async Programming
- **AI / LLM:** LangChain, LlamaIndex, CrewAI, RAG, Pinecone, ChromaDB, PyTorch
- **Databases:** PostgreSQL, MySQL, MongoDB, SQLite
- **Tools:** Git, Docker, Vercel, Postman, npm (Private Registry)

EXPERIENCE

- **JFreaks Software Solutions, Lahore** Onsite
AI Full Stack Engineer Apr 2025 – Present
 - **Frontend Engineering:**
 - * Built and maintained the **APIFreaks** frontend end to end across multiple **Next.js/TypeScript** repositories: website, developer tools, and API documentation.
 - * Created a shared component and utility package, published to a **private npm registry** and reused across all frontend repositories.
 - * Fixed a critical authentication redirect loop affecting about 20 call sites, and debugged **Core Web Vitals** (LCP, CLS, INP) issues.
 - **Backend & AI Development:**
 - * Designed and deployed production APIs for **Speech-to-Text, Text-to-Speech, and Voice Cloning** using **FastAPI** and async Python, serving concurrent users.
 - * Optimized audio processing pipelines for real-time inference and lower latency.
 - * Cleaned up inconsistent bank names and addresses in a **PostgreSQL** SWIFT code dataset, automating safe fixes and routing risky changes to manual review.
 - * Set up an AI-assisted development workflow with custom coding agents and **MCP** integrations across repositories.
- **PureLogics, Lahore** Onsite
AI Engineer Intern Jun 2024 – Sep 2024
 - **AI/ML Development:**
 - * Developed RAG-based NLP solutions with **LangChain** and **LlamaIndex**, optimizing vector search with Pinecone and ChromaDB.
 - * Built deep learning models (CNN, RNN, LSTM) with NumPy and implemented object detection with **YOLO**.
 - **Featured Projects:**
 - * **Multimodal Chatbot with RAG:** Built a chatbot over PDF documents using LangChain, Gemini API, and Pinecone, with Tavily web search as a fallback when retrieved context was insufficient.
 - * **HR Review Automation System:** Developed a multi-agent HR review system with **CrewAI**, where agents run sequential tasks and pass outputs to each other.

SELECTED PROJECTS

- **FYP: Sign Connect, Voice to Sign Language Generation (Speech Processing, NLP):**
 - Developed a voice-to-sign-language generation system using **Progressive Transformers** on the PHOENIX-14T dataset.
 - Implemented a **TSPNet**-based detection module for hierarchical feature learning in sign language translation.**Tech:** Python, Transformers, PyTorch (2025)
- **Professional Services Management System (Full Stack Web App):**
 - Built a web app where users hire professionals such as electricians, plumbers, and beauticians from home, with separate **customer and service provider roles**.
 - Implemented service ordering, **real-time chat** between customers and providers, and a two-way review system.**Tech:** React, Node.js (2023)

CERTIFICATIONS

1. **SQL HackerRank (Advanced)**
2. **Python HackerRank (Basic, Intermediate)**
3. **Introduction to Generative AI (Google Cloud)**
4. **React Basic (Great Learning)**
